

It's an adventure for children to look at police equipment so closely and learn law enforcement techniques from officials.

## *Visitors get a peek into methods used by undercover agents at Adventure Island*

**By a staff reporter**

ABU DHABI — Visitors to the 'Adventure Island' in Abu Dhabi National Exhibition Centre, particularly kids, are getting an opportunity to try their hand at basic law-enforcement and spying techniques to complete a simulated mission by evading detection and capture in a 'Science of Spying' exhibition.

The thrilling event at 'Adventure

Island' is part of the ongoing Abu Dhabi summer festival, which concludes on August 18, a Press release said on Tuesday.

The 1,000-square-metre 'Science of Spying' travelling interactive exhibition from London introduces visitors to the latest skills and methods used by undercover agents.

Abu Dhabi police officers demonstrate the latest law-enforcement techniques, technologies and

equipment to the children.

First-Lieutenant Fawaz Ali Abdulla said, "We are honoured to be able to pass our knowledge to the young generation who are our future leaders, in a fun and interactive environment. It is important to maintain community confidence and adopt the best international practices to safeguard public safety and control crime in Abu Dhabi."
